Live streaming has not changed since 2007.

JUSTIN.TV, 2007

TWITCH, 2026

> Nineteen years. The audience is still a chat box.

INVITED GUESTS EXIST. AN AUDIENCE THAT CAN WALK ON DOES NOT.

And the audience is split four ways.

Twitch	YouTube	TikTok	Kick
YOUR STREAM	OUT OF REACH	OUT OF REACH	OUT OF REACH

- Multistream tools move video. Audiences stay split.
- Each platform keeps its own audience.

> Production. Reach. Participation. Today, pick two.

One origin. Every platform. Anyone on screen.

Twitch

YouTube

TikTok

Kick

Anyone

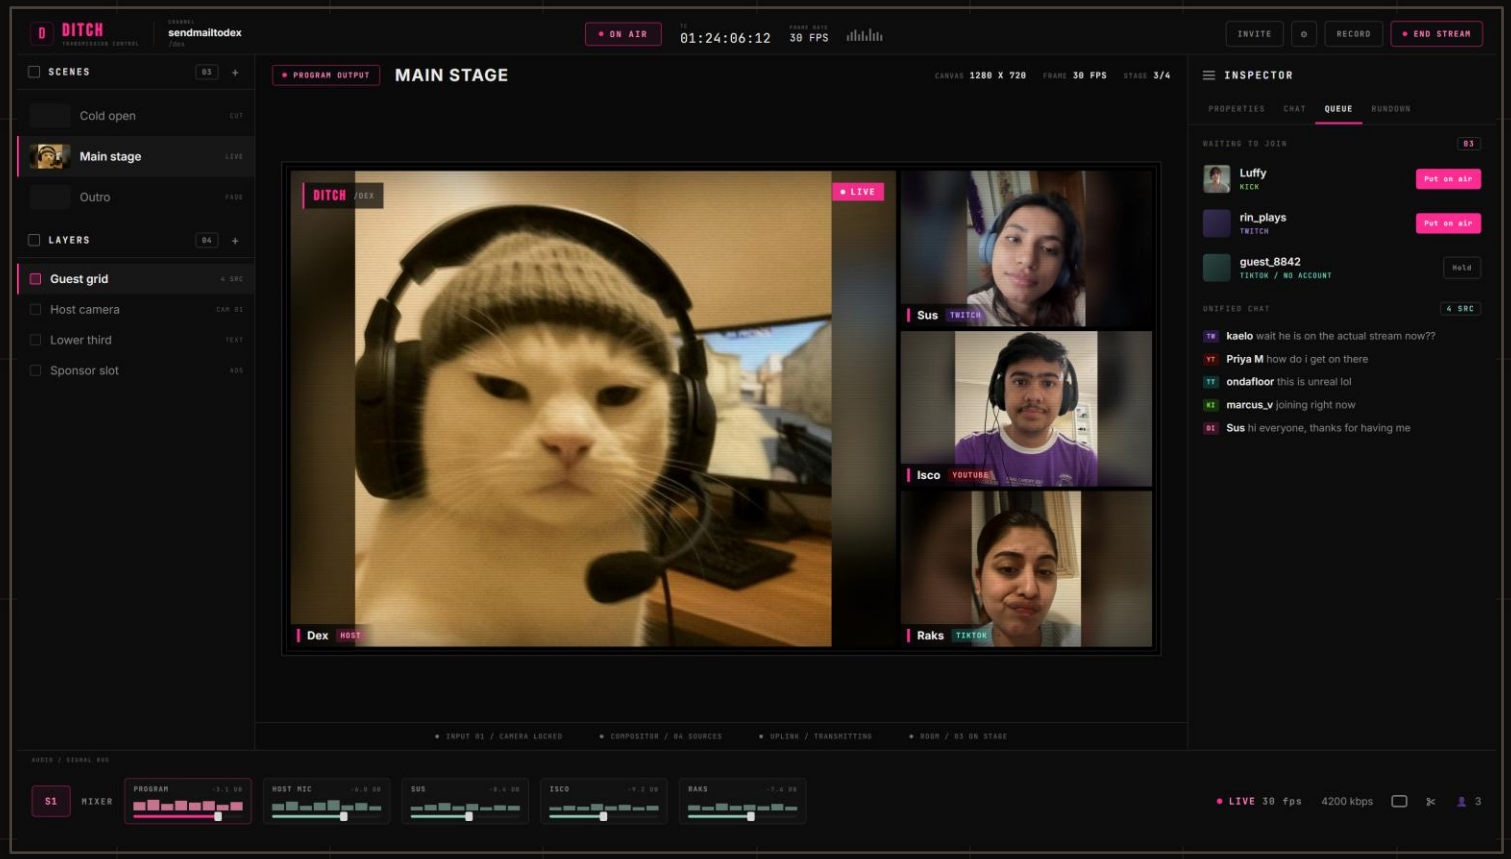

Production Scenes, layers, screenshare, audio

Distribution One encode to every destination

Participation No account, no download, on screen

One origin unifies the show and the audience.

The entire live operation runs in one browser tab.

Scenes. Stage queue. Unified chat. Audio bus. One show.

DITCH is the origin - not another relay.

- Guests join the program before distribution begins.
- Every platform receives the same finished live show.
- Relay products move streams. DITCH moves the audience.

> Participation travels with the stream.

A guest appearance becomes distribution.

01 Someone in the audience appears on screen

02 They open the DITCH channel and request a slot

03 They go live everywhere the creator is broadcasting

04 Their friends arrive to watch - and join

> Participation is the acquisition loop.

DITCH shares the upside of participation.

60%

of sponsored-slot revenue goes to the creator

- Brands sponsor a seat inside the live show.
- A real person fills it across every destination.
- Creator subscriptions add EUR 30-70 per month.

> One sponsored event can cover the subscription.

EUR 1M ARR needs only 2,000 creators.

BEACHHEAD ONLY: MULTI-PLATFORM CREATORS. ILLUSTRATIVE BOTTOM-UP MODEL, COUNTS ARE FOUNDER ASSUMPTIONS.

TAM	**EUR 1.1B**	2M live-earning creators x EUR 45 per month
SAM	**EUR 270M**	500k multistream creators
